February 11, 1987

Dr. Harmon C. McAllister
Research Director
The Council for Tobacco Research-U.S.A., Inc.
900 Third Avenue
New York, NY 10022

Dear Harmon:

Thanks for getting in touch with me while you were in Ann Arbor last Monday.

To be more specific about my inquiry concerning possible support from The Council for Tobacco Research for scientific meetings, I have been trying to aid the organizers of the VIIth International Symposium on Microsomes and Drug Oxidations 1987 in obtaining travel support for lecturers, and have been able to provide only \$4,500 from my IUB Committee on Interest Groups. The organizers and I would be most appreciative if your Council could provide \$2,500 for that purpose. You will find enclosed my letter to Dr. Donald Birkett concerning the IUB support, as well as the Symposium announcement and some detailed information about the meeting. As you probably know, this series of international meetings is the best in the P-450 field and clearly relates to xenobiotic metabolism, chemical carcinogenesis, and related topics. Unfortunately, the cost of travel from Europe or North America to Australia is so high that the number of visitors won't be as large as at previous such meetings unless we can obtain additional support. If you are able to act favorably on this request, the support should be sent directly to Dr. Birkett in Australia or in my care to be forwarded to him.

I look forward to hearing from you about the details of some other matters you raised, such as your need for additional reviewers of grant proposals.

With best regards,

Sincerely yours,

20:LHM
